

# inform

The first machine equipped with a dynamic interface and interactive on-line services...

## DESIGN

The concave door is unusual and eye-catching. An LCD 22" touch-screen monitor immediately captures customers' attention. An LED lights up when the chosen drink is ready.

## INNOVATION

The LCD 22" touch-screen monitor dramatically increases the possibilities for customization, introducing operators and consumers to a new world of interactivity in vending. The interface provides innovative content, such as information (nutritional and more) about the products and advertising and commercial videos. The machine can be customized in line with location, geographical area or market, or used for promotion of the products dispensed. It is equipped with audio output and a people sensor with a programmable limits.

## INTERACTIVE VENDING

The touch-screen monitor can be used for a variety of purposes, for example it can carry marketing and advertising campaigns, nutritional information about the products or pass on news and notices to employees (electronic notice board). Management of the multimedia content and drinks configuration is extremely simple. The machine can be connected to the local network (LAN) via ethernet cable or 3G modem. The graphic interface can be updated remotely. The machine periodically checks for updates from a server and when it finds an update, it downloads it locally and automatically installs it on the machine.

## PROGRAMMING (rheAction)

Highly flexible programming and personalized selection profiling can be achieved with rheAction support software, meaning recipes and prices can be differentiated depending on the time of day.

## DATAAUDIT (rheAction data analyzer)

Sales data available in EVA-DTS format through IRDA or Flash key. Extended data audit from first start-up. The rheAction data analyzer processes collected statistical data.

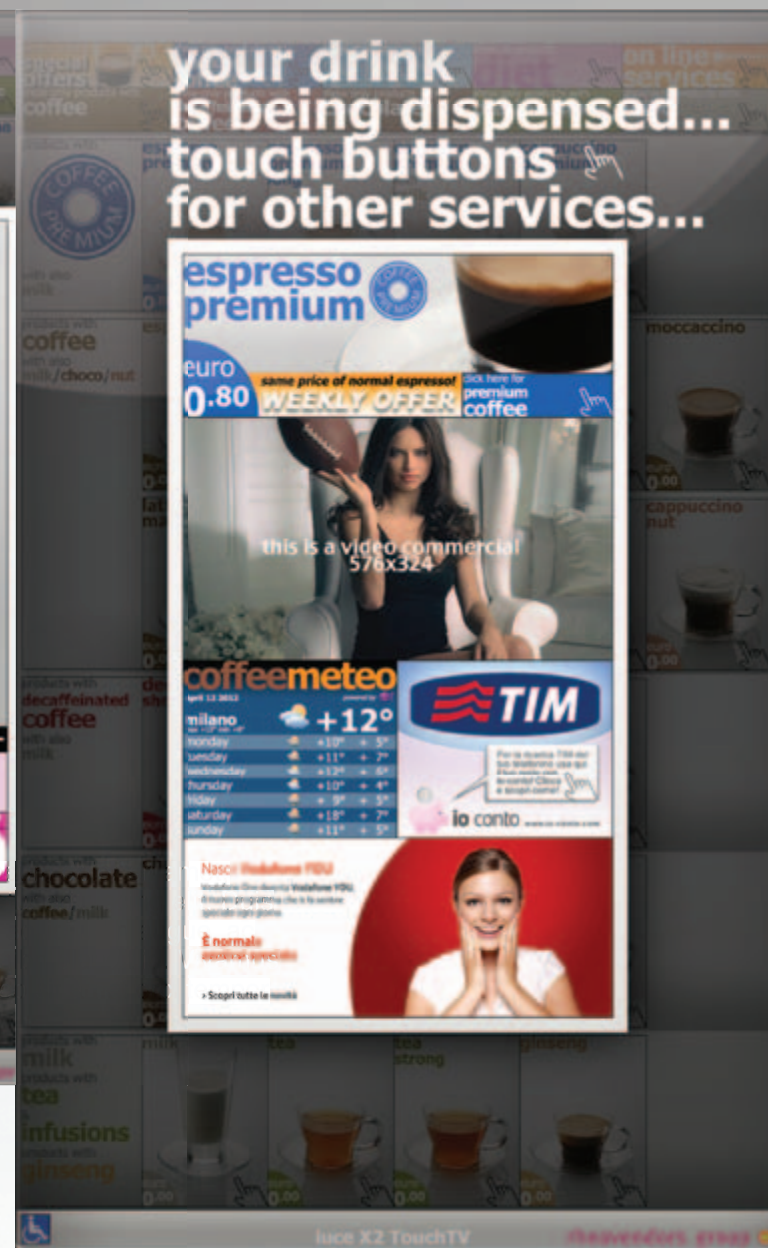

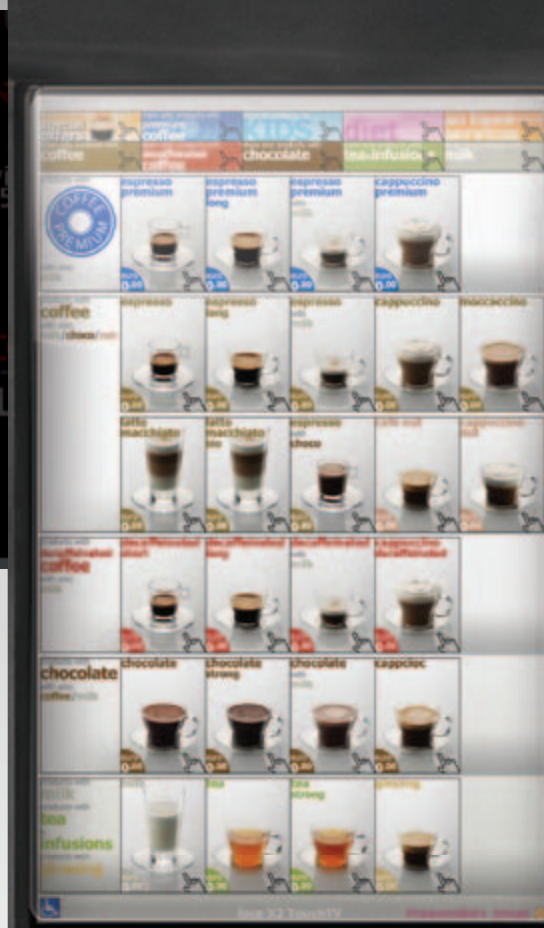

## ENERGY CONSUMPTION

Energy saving features:  
- programmable switch on/off times to keep the machine on standby when inactive;  
- use of low-wattage LEDs.

be online

be rheady

## ATTRACTION

Let yourself be ATTRACTED by the images and videos, and approach the machine.

## rheady suite

A platform that integrates the following tools in a single programming environment:

**rheAction:** graphic software to simply and intuitively configure all the machine's technical parameters (recipes, prices, temperatures, payment systems, energy saving);

**rhea media:** is a tool that allows the graphic interface of the new touchTV machines to be customized: you can enter your own backgrounds, banners and videos, and customize the selection menu;

**rheAction data analyzer:** analysis software that processes all data recorded by the machine when in operation. Graphs can be generated - the daily distribution of sales of a certain selection, for example;

**telemetry module:** with this component new graphic interfaces (GUI pack created through rhea media) and/or new configurations (created through rheAction) can be sent remotely to each on-line machine.

## rhealtime

An on-line library of shared media content (videos, images, photos) that you can use in the vending machine. Becoming part of the rhealtime network gives you access to rheavendors group public libraries and the chance to create personal libraries.

TECHNICAL SPECIFICATIONS		INSTANT	ESPRESSO
SELECTIONS		64 max	64 max
DATI TECNICI			
Height (mm)		1830	1830
Depth (mm)		705	705
Width (mm)		640	640
Weight (kg)		145	165
Max no. canisters		8	9
Max no. mixing bowls		5	5
No. of boilers		1	2
Boiler capacity (l)		3,4	0,4 e 3,4
Electrical supply (V-Hz)		230-50/60	230-50/60
Power (W)		1700	2800
Water connections		3/8" male face 0.1-0.8 MPa with anti-flood sensor black & silver	
STANDARD COLOUR			
CUPS			
1 turret cup dispenser			
Ø 70 mm		700	700
Ø 73 mm		670	670
2 turrets cup dispenser			
Ø 70 mm		450	450
Ø 73 mm		430	430
Ø 78-80 mm		400	400
STIRRER LENGTH (mm)		89/104/115/125	89/104/115/125

#### EXAMPLE CONFIGURATION

Instant version

Espresso version

Wide range of customization  
Compatible with all payment systems

 **rheady suite**

#### OPTIONS

Sales data collection through RFID system  
Data audit in accordance with EVA / DTS standards  
Use of plastic or paper cups  
Cup sensor  
Cooling unit for cold drinks  
Independent water tank kit 20 l  
FBT module for leaf tea

Information is related to standard machine models, further configurations are available on request. Last update 04/2013
